PROFESSIONAL PROFILE

Software engineering graduate (2026, with jury congratulations), junior full-stack developer working with Java / Spring Boot and React / TypeScript. Developed DocuCheck, a banking KYC/KYB compliance platform comprising 7 microservices, Kafka, PostgreSQL, and an LLM document pipeline (Python, FastAPI, LangGraph). Seeking a junior Full-Stack / Software Developer position.

PROFESSIONAL EXPERIENCE

Final-Year Internship (PFE) — DeepshiftIA Jan 2026 – Jul 2026

Ghazala Technopark, Ariana, Tunisia

DocuCheck — AI-assisted KYC/KYB compliance and trade finance platform

- Designed a microservices full-stack platform (Spring Boot 3, Spring Cloud, React 19/TypeScript): 7 services behind an API Gateway, Eureka service discovery, RS256-signed JWT authentication, each with a dedicated PostgreSQL database.
- Developed a 5-stage AI document pipeline (Perception → Extraction → Refiner → Compliance → Control) with Python/FastAPI and LangGraph; migrated from Tesseract OCR to Groq Vision (LLM); added human review, audit trail, and AML/OFAC sanctions filtering (RapidFuzz).
- Implemented real-time event-driven communication with Kafka, Redis/TaskIQ, and WebSocket, and containerized services with Docker.

AiVision — AI-powered maturity assessment platform

- Developed a full-stack AI maturity assessment platform (Node.js/Express + FastAPI + React/TypeScript), with a provider-independent LLM layer (OpenAI, Claude, Gemini, Groq, OpenRouter), structured and auditable scoring, confidence levels, and cited evidence.
- Developed the REST API (Express, Prisma/PostgreSQL on Supabase, JWT, RBAC), React/Recharts dashboards, audio transcription, and automated PDF reports (Puppeteer).

Software Engineering Intern — Wico Technologies Jul 2025 – Sep 2025

Remote

- Developed the backend of a shared taxi trip management platform with Spring Boot: secured REST API, session management, and Spring Security.
- Developed the mobile frontend (Angular/Ionic) with booking and real-time trip tracking via WebSockets; modeled customers, drivers, trips, and bookings in MariaDB using Agile/Scrum.

Field Operations Intern — Tunisie Telecom Jul 2024 – Aug 2024

Kebili, Tunisia

- Contributed to deploying the HUB4 infrastructure connecting more than 20,000 residents in the Douz region.

PROJECTS

Portfolio — Production-ready personal portfolio and deployment project 2026

Personal project | Live

- Designed and deployed a full-stack portfolio with a React/TypeScript frontend and FastAPI backend, containerized with Docker and Docker Compose.
- Deployed on an Azure Linux VM behind Nginx, with a custom domain, HTTPS/Let's Encrypt, firewall configuration, and containers exposed only on localhost.
- Implemented CI/CD with GitHub Actions: pull request protection, Ruff, ESLint, Prettier, automated backend tests, Docker builds, and production deployment over SSH.
- Added production health checks, server monitoring with GoAccess/btop, Nginx logs, and backup/restore procedures.
- In progress: strengthening the deployment pipeline with dependency and security analysis, E2E tests, DAST, load tests, and rollback procedures.

TaskFlow — Real-time collaborative Kanban platform

- REST API (.NET 8/EF Core, PostgreSQL), ASP.NET Core MVC + KnockoutJS frontend, and real-time synchronization via SignalR.

Rasmi — AI-assisted academic email generator
Live demo: rasmi-alpha.vercel.app

- Angular 17 + FastAPI application that transforms a short intent into a formal email in French; optional local LLM mode via Ollama; Dockerized deployment.

ApiDesk — Desktop REST API client 2026
Personal project

- Built a desktop REST client in C#/.NET 10 (WPF, MVVM) supporting GET, POST, PUT, PATCH, and DELETE requests, query parameters, headers, and JSON bodies.
- Implemented response inspection (status, duration, headers, body), JSON syntax highlighting, collections, environment variables, local persistence, request cancellation, and error handling.
- Analyzed the workflows of the open-source Bruno API client as a reverse-engineering exercise, then independently implemented its core functionality.

Medical appointment booking application (MERN stack) Jan 2025 – May 2025

- Node.js/Express, JWT authentication, responsive Tailwind interface; 95% booking success rate and response time below 200 ms.

PFA — Real-time AI transcription of medical consultations (Labes) Jan 2025 – May 2025
Gabes, Tunisia

- Fine-tuned Whisper with PyAnnote speaker diarization and an LLM to produce structured summaries; reduced report-writing time from 20 to 11 minutes (-45%) in tests with doctors. FastAPI, Express.js + React, JWT, MySQL.

EDUCATION

Engineering Degree in Software Engineering (Master's equivalent) Sep 2023 – Sep 2026
ISIMG Gabes — Jury congratulations (Very Good distinction) | 12.06 | 13.86 | 15.07 | 17.00 / 20

Integrated Preparatory Cycle (MPI track) Sep 2021 – Jun 2023
ISIMG Gabes — Good distinction

SKILLS

Backend: Spring Boot 3, Spring Cloud, REST API, FastAPI, Node.js/Express, Kafka, WebSocket, .NET 8 / EF Core
Programming: Java, Python, JavaScript/TypeScript, C#
Databases: PostgreSQL, MySQL, MongoDB, MariaDB, Microsoft SQL Server
DevOps: Docker, Git, CI/CD (GitHub Actions, GitLab CI), Azure, Nginx, Linux
AI / **Machine Learning:** LLM integration (Groq Vision), LangGraph, Transformers, Whisper fine-tuning, PyAnnote, RapidFuzz
Frontend: React 19 / TypeScript, Angular, ASP.NET Core MVC, Tailwind CSS
Methods / **Tools:** Agile/Scrum, unit testing (xUnit), Postman
Languages: Arabic (native), French (professional proficiency), English (professional proficiency)

CERTIFICATIONS

- Model Context Protocol — Anthropic Academy (Mar 2026)
- Python 101 for Data Science — Cognitive Class (Oct 2024)
