

# MOHAMED ALI MAALI

Junior Software Engineer — Backend / Full-Stack

Kébili, Tunisia | maalimohamedalieng@gmail.com | +216 95 088 782 | linkedin.com/in/mohamed-ali-maali-4787 | github.com/udali22

## PROFESSIONAL SUMMARY

---

Software engineer with an Engineering Degree in Software Engineering from ISIMG Gabès, specialized in backend development, distributed microservices, full-stack applications and AI/LLM integration. Hands-on experience with Spring Boot, Kafka, PostgreSQL, FastAPI, React/TypeScript and Docker, with practical experience deploying and operating applications on Azure. Seeking a junior Software Engineer, Backend or Full-Stack role.

## WORK EXPERIENCE

---

### Final-Year Internship (PFE) — DeepshiftIA

Jan. 2026 – Jul. 2026

*Technopole Ghazala, Ariana, Tunisia*

#### **DocuCheck — AI-assisted KYC/KYB & trade-finance compliance platform**

- Designed a full-stack microservices platform (Spring Boot 3, Spring Cloud, React 19/TypeScript): 7 services behind an API Gateway with Eureka discovery and RS256-signed JWT authentication, each with a dedicated PostgreSQL database.
- Built a 5-stage AI document pipeline (Perception → Extraction → Refiner → Compliance → Control) in Python/FastAPI with LangGraph, migrating from Tesseract OCR to Groq Vision (LLM), with human-in-the-loop review, audit trail and AML/OFAC sanctions screening (RapidFuzz).
- Set up real-time, event-driven communication with Kafka, Redis/TaskIQ and WebSocket, and containerized services with Docker.

#### **AiVision — AI-powered maturity assessment platform**

- Built a full-stack AI maturity-assessment platform (Node.js/Express + FastAPI + React/TypeScript) using a provider-agnostic LLM layer (OpenAI, Claude, Gemini, Groq, OpenRouter) with structured, auditable scoring, confidence levels and cited evidence.
- Built the REST API (Express, Prisma/PostgreSQL on Supabase, JWT, RBAC), React/Recharts dashboards, audio transcription and automated PDF reports (Puppeteer).

### Software Engineering Intern — Wico Technologies

Jul. 2025 – Sept. 2025

*Remote*

- Built the backend of a shared-taxi trip management platform with Spring Boot: secured REST API, session management and Spring Security.
- Developed the mobile frontend (Angular/Ionic) with real-time booking and trip tracking via WebSockets; modeled clients, drivers, trips and bookings on MariaDB in Agile/Scrum.

### Field Operations Intern — Tunisie Telecom

Jul. 2024 – Aug. 2024

*Kébili, Tunisia*

- Contributed to the deployment of the HUB4 infrastructure connecting 20,000+ residents in the Douz region.

## PROJECTS

---

### Portfolio — Production-ready personal portfolio & deployment project

2026

*Personal project | Live*

- Built and deployed a full-stack portfolio with React/TypeScript frontend and FastAPI backend, containerized with Docker and Docker Compose.
- Deployed on an Azure Linux VM behind Nginx with a custom domain, HTTPS/Let's Encrypt, firewall configuration and localhost-only container exposure.
- Implemented GitHub Actions CI/CD with pull-request protection, Ruff, ESLint, Prettier, automated backend tests, Docker builds and SSH-based production deployment.

- Added production health checks, server monitoring with GoAccess/btop, Nginx logging and backup/recovery procedures.
- Ongoing: strengthening the deployment pipeline with dependency/security scanning, E2E testing, DAST, load testing and rollback procedures.

**TaskFlow — Real-time collaborative Kanban platform** 2026

- REST API (.NET 8/EF Core, PostgreSQL), ASP.NET Core MVC + KnockoutJS frontend, real-time synchronization via SignalR.

**Rasmi — AI-powered academic email generator** Nov. 2025

*Live demo: rasmi-alpha.vercel.app*

- Angular 17 + FastAPI app turning a short intent into a formal French email; optional local-LLM mode via Ollama; Dockerized deployment.

**Medical Appointment Booking Application (MERN stack)** Jan. 2025 – May 2025

- Node.js/Express, JWT authentication, responsive Tailwind UI; 95% booking success rate, response times under 200 ms.

**PFA — Real-Time AI Medical Consultation Transcription (Labes)** Jan. 2025 – May 2025

*Gabès, Tunisia*

- Fine-tuned Whisper with PyAnnote speaker diarization and an LLM for structured summaries; reduced report-writing time from 20 to 11 min (-45%) in physician tests. FastAPI, Express.js + React, JWT, MySQL.

**EDUCATION**

---

**Engineering Degree in Software Engineering (MSc equivalent)** Sept. 2023 – Sept. 2026

*ISIMG Gabès — Highest Honors (Mention Très Bien) | 12.06 | 13.86 | 15.07 | 17.00 / 20*

**Integrated Preparatory Cycle in Computer Science** Sept. 2021 – Jun. 2023

*ISIMG Gabès — Mention Bien*

**SKILLS**

---

**Backend:** Spring Boot 3, Spring Cloud, REST APIs, FastAPI, Node.js/Express, Kafka, WebSocket, .NET 8 / EF Core

**Programming:** Java, Python, JavaScript/TypeScript, C#

**Databases:** PostgreSQL, MySQL, MongoDB, MariaDB, Microsoft SQL Server

**DevOps:** Docker, Git, CI/CD (GitHub Actions, GitLab CI), Azure, Nginx, Linux

**AI / Machine Learning:** LLM integration (Groq Vision), LangGraph, Transformers, Whisper fine-tuning, PyAnnote, RapidFuzz

**Frontend:** React 19 / TypeScript, Angular, ASP.NET Core MVC, Tailwind CSS

**Methodologies / Tools:** Agile/Scrum, unit testing (xUnit), Postman

**Languages:** Arabic (Native), French (Professional working proficiency), English (Professional working proficiency)

**CERTIFICATIONS**

---

- Model Context Protocol — Anthropic Academy (Mar. 2026)
- Python for Data Science — IBM (Oct. 2024)
